

Freyssinet Limited

Environmental Policy Statement

At Freyssinet Limited, in accordance with the Group ethos of "Sustainable Technology" we take a close and responsible interest in managing the environmental impact of all of our activities. This policy sets out the company's commitment to operating in an environmentally sensitive manner and enforcing the company goal of providing sustainable technology whilst maintaining continual improvement in environmental performance.

We will make our employees, customers and suppliers aware of key environmental issues. We will consult with them and encourage them to be responsive and flexible and to plan for the changing environmental surroundings in which they operate.

We will prevent pollution of the environment as a result of our own and our subcontractors' activities.

We will actively market and promote construction and repair techniques that use sustainable technologies and reduce environmental impacts and ensure that the environmental impact for the life cycle of the plant used by the company is minimised as far as possible.

Freyssinet operates an environmental management system, which meets BS EN ISO 14001, this includes a means of monitoring environmental performance, identifying non-conformance and implementing corrective actions where these may be required. We utilise this system to implement continuous improvement throughout the scope of our operations.

We will comply with relevant environmental legislation, guidance, good practice and other requirements. We aim to lead by example and will promote good environmental practice and the principles of Sustainability and energy efficiency throughout our business.

Environmental objectives and targets will be set and these will be subject to annual review. The board of Freyssinet Limited has overall responsibility for reviewing the company's environmental activities and performance.

The policy will be made available to members of staff, posted on office notice boards and will be made available to stakeholders on request.

P Bottomley, Managing Director
