

Carbon Reduction Plan

Supplier name: Freyssinet UK
Publication date: November 2025

Commitment to Achieving Net Zero

Freyssinet UK is committed to achieving net zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year for Scopes 1 & 2: 2021	
Baseline year emissions:	
Emissions	TOTAL (tco ₂ e)
Scope 1	1038
Scope 2	34
Total Emissions	1072

Baseline Year for Scope 3: 2022	
Baseline year emissions:	
Scope 3	
Concrete	69
Cement	482
Iron	28
Steel	1221
Total Emissions	1800

Current emissions reporting

Reporting year: 2024	
Emissions	TOTAL (tco ₂ e)
Scope 1	692
Scope 2	21
Concrete	140
Cement	207
Iron	91
Steel	1642
Scope 3 total	2078
Total Emissions	2791

Carbon reduction targets

We have made the commitment to secure 100% of our Scope 1 energy needs from zero-carbon sources by 2050. We will secure 100% of our electricity needs from zero-carbon sources by 2040 or sooner. Our emissions targets are aligned with global net-zero by 2050.

Progress against these targets can be seen in the graphs below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline.

- Green electricity tariff implemented in applicable areas since 2022
- Battery packs used to reduce generator running times
- Transition of 51% company cars to electric vehicles
- Carbon Management Manual published in 2025
- Carbon-related tool box talks created
- PAS 2080 related training for key staff
- Achieved verification to PAS 2080:2023 Carbon Management in Infrastructure and Built Environment with BSI

Planned carbon reduction initiatives

In the future we intend to implement further measures such as:

- Continue transition to electric cars and vans
- Use of HVO in areas where zero emissions alternatives not yet available
- All welfare units to be zero emission by 2030
- Transition to electric plant on site
- Secure 100% of our electricity needs from renewable sources by 2040
- Signing up to the Science Based Targets initiative (SBTi)

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Signed on behalf of the Supplier:

..... Stéphane Carayol, Managing Director
